Software Developer

Object-Oriented Analysis	Extensive coding knowledge	Relational Database Systems

- 8 years of software development experience, proficient in Java, Javascript, Database
- Graduated with a Diploma in Information Systems
- Logical thinker, positive work ethic, flexible, quick learner and adaptable
- Strong written, verbal and interpersonal skills
- Strong organizational and analytical skills, ability to multi task, problem solving and decision-making

Technical Skills

Bootstrap, Angular, NgRx, React Native, Javascript, CSS, HTML, Java, Spring, JSF, JSP, MySQL, SQL Server, Hibernate, AWS, GIT, Docker, Jenkins, Maven, Websphere, API REST/RESTful

Related Work Experience

Software Developer at *Fundação Carlos Chagas* (Brazil, SP - April/2019 - October/2019)
- o Create news classes according to documentation to improve the system, bug fix and sync the code with team, build and improve databases to fit new features, solve merging and commit reviewed codes for approval on DevOps Mat
- o Fullstack Web Application Development of public tender systems, portals, billet generation, remittance and return bank file handling with Angular, NgRx, Java 8, JSP, Mentawai, Spring, API REST/RESTful, Hibernate, MySQL, SQL Server, Jenkins, Tomcat and Eclipse.

Software Developer at *Samsung SDS Cello Logistics* (Brazil, SP - October/2018 - April/2019)
- o Create news classes according to documentation to improve the system, bug fix and sync the code with team, build and improve databases to fit new features, solve merging and commit reviewed codes for approval on DevOps Mat
- o Fullstack Development of WEB Applications with Angular, Java 8, JSF, Primefaces, Maven, Hibernate, Jasper Reports, SQL Developer - Oracle, Eclipse, WildFly, Spring, Google Cloud and Docker.
- o *Main Projects:*
    - ▪ Mais Brasil - File Reader Software for process batch information from multiple files from FTP to database
    - ▪ WMS - Warehouse Management - System, System for control client's warehouse activities
    - ▪ Gerdau Dumpster Tracking - System to track dumpsters through Google Maps and Google Geolocation APIs in real time.

Software Developer at *Magna Sistemas* (Brazil, SP - July/2017 - October/2018)
- o Create news classes according to CMMI documentation, to improve the system, bug fix and sync the code with team, build and improve databases to fit new features, solve merging and commit reviewed codes for approval on DevOps Mat
- o Fullstack Development of WEB Applications with Angular, Java 8, JSF, Primefaces, Maven, Hibernate, Jasper Reports, MySQL, SQL Server, Eclipse, WildFly, Websphere and Spring.
- o *Main Projects:*
    - ▪ Electronic Police Station for *the government of São Paulo State, Brazil* - System to register criminal occurrences
    - ▪ TOTVS-HR integration for IBM Case Manager at *JBS Friboi* - Software to process batch information between systems
    - ▪ Traffic Ticket System for *the government of São Paulo State, Brazil* - System, to management of traffic tickets.

Software Developer *at MMCS Sistemas* (Brazil, SP - March/2016 - June/2017)

Business Intelligence Analyst at *Ibope DTM* (Brazil, SP - June/2015 - March/2016)

Systems Developer at *Siscart* (Brazil, SP - May/2014 - April/2015)

Systems Analyst at *Livraria Cultura* (Brazil, SP - July/2011 - February/2014)

Support Analyst at *Livraria Cultura* (Brazil, SP - February/2011 - June/2011)

IT Auxiliary at *Advanta* (Brazil, SP - 2009 - 2010)

Technical Support at *Atento Brasil* (Brazil, SP - 2008 - 2009)
